

Wait will share you...kyuki beta mai sab sahi hai data...Friday ko maine bataya tha tab om Vishesh and aap bhi the to tab aapne hi confirm kiya tha ki beta ki image deploy karo...cost, waste data match nhi ho raha tha...tab om bola ki beta mai se prod merge hua to kuch merge conflict hua hoga..tab Vishesh bola tha ki ek baar tera code review kar kya mismatch dikh raha haii wo dekh

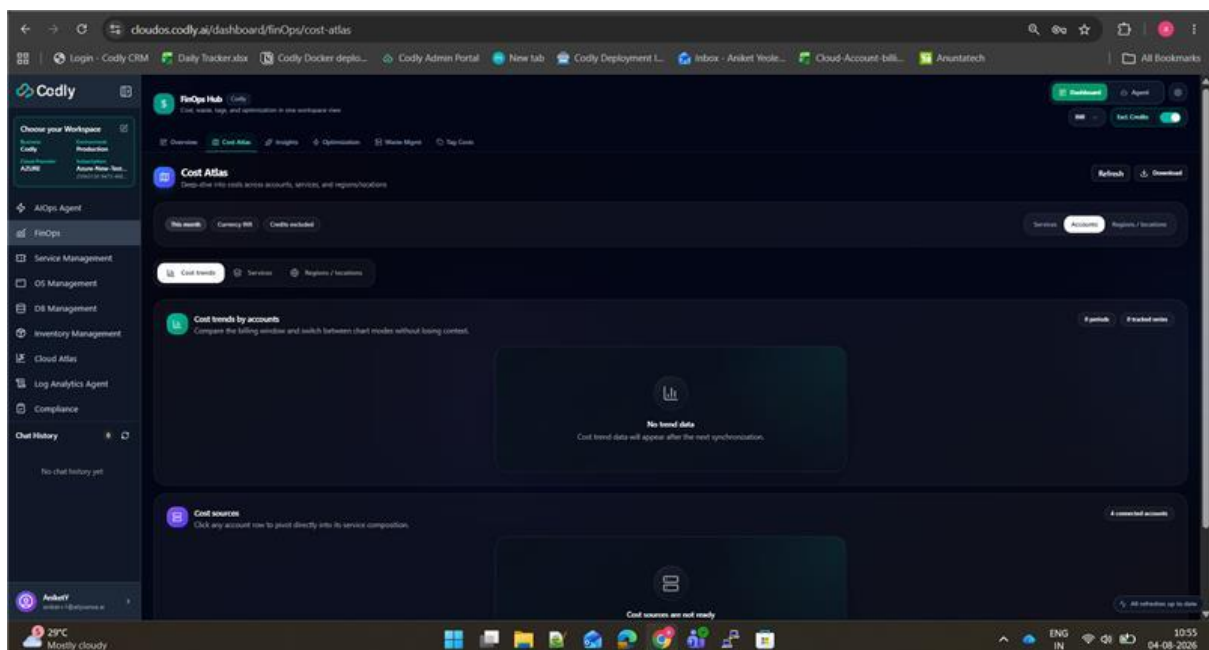

I know this story

I am asking send me ss of comparison

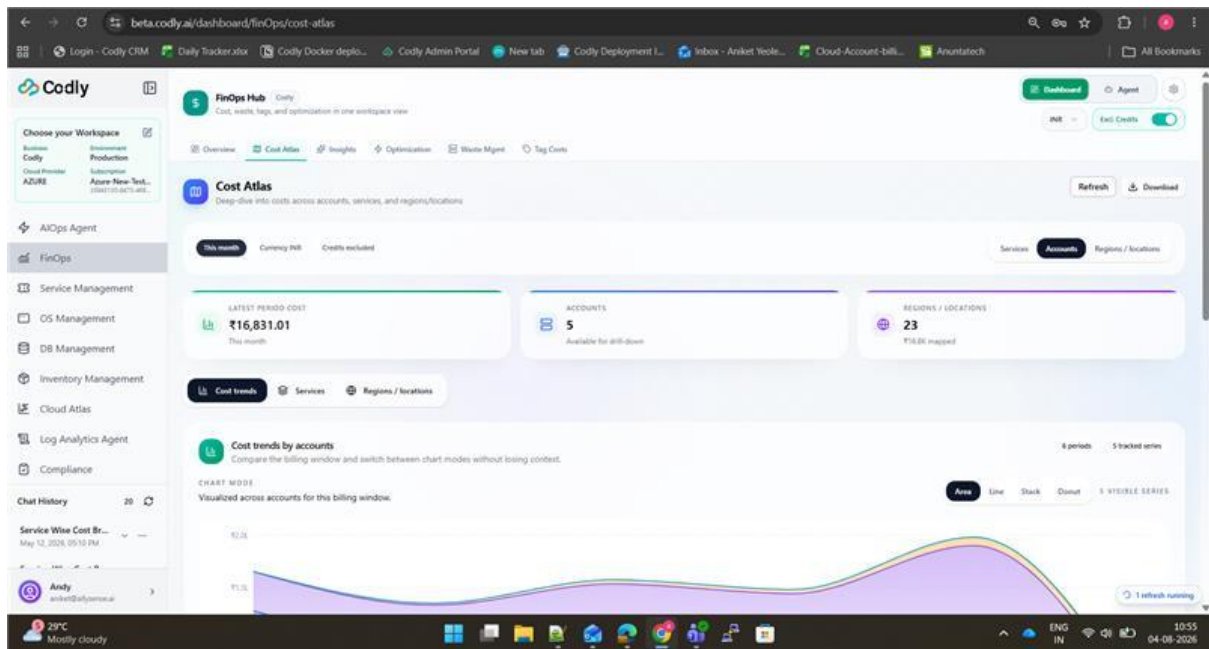

which data is different in prod and beta

Ok...allow me sometime will share the screenshots

Prod -> in cost atlas not shown any data...after refresh 2 time

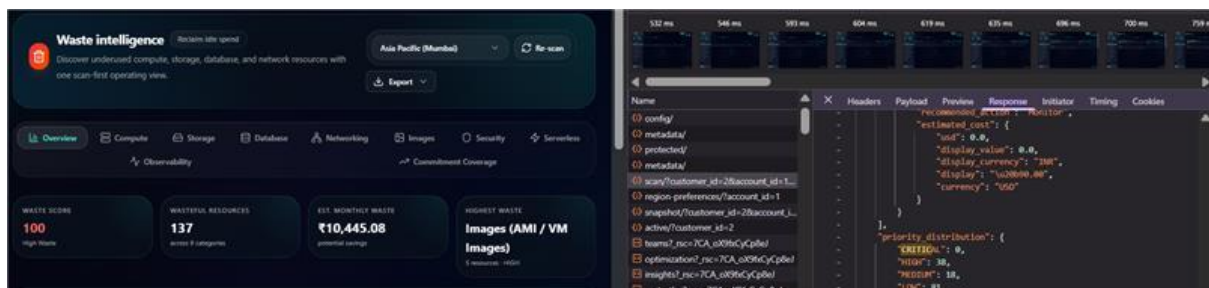

Beta -> shown all data

Once all my calls are completed, I'll share all the updates here.

yes pl

```
const wasteScore = Math.min(100, Math.round(
  (data.priority_distribution.CRITICAL || 0) * 25 +
  (data.priority_distribution.HIGH || 0) * 15 +
  (data.priority_distribution.MEDIUM || 0) * 8 +
  (data.priority_distribution.LOW || 0) * 3
));
```

waste management "score" is not there in the backend response, but its calculated on the frontend like this formula above

Aniket Yeole

Prod -> in cost atlas not shown any data...after refresh 2 time 🙄 Beta -> shown all data 🙄

Om Sawant why is this happening?

this usually gives 100 as the score and it doesn't seem right always

Let me check this

There is no difference in Beta and prod for Finops

arree ss bheje hain anu=iket ne

Aniket ne

check to karo kyon aise ho raha hai if code is same

Yes i am looking into this
