Amazon Elastic Compute Cloud - Compute — 2026-06-29

Severity: Info | Type: Other | Actual: \$21.32 | Baseline: \$9.80 | Change: +117.7%

Amazon Elastic Compute Cloud - Compute cost increased on 2026-06-29 by \$12/day without any new or scaled resource — usage looks stable, so this is likely a pricing/rate change (tier change, reservation expiry, or discount rolloff).

Amazon Elastic Compute Cloud - Compute — 2026-06-21

Severity: Critical | Type: Price Drop | Actual: \$1.47 | Baseline: \$11.48 | Change: -87.2%

Amazon Elastic Compute Cloud - Compute cost dropped on 2026-06-21 by \$10/day without any resource being removed or scaled down — usage looks stable, so this is likely a pricing/rate change (reservation/savings plan applied, or a discount).

Amazon Elastic Compute Cloud - Compute — 2026-06-28

Severity: Info | Type: Price Drop | Actual: \$1.38 | Baseline: \$10.56 | Change: -86.9%

Amazon Elastic Compute Cloud - Compute cost dropped on 2026-06-28 by \$9/day without any resource being removed or scaled down — usage looks stable, so this is likely a pricing/rate change (reservation/savings plan applied, or a discount).

AWS Cost Explorer had a one-time cost increased on 2026-06-25 of \$7/day that reverted the next day — likely a burst of API calls or log/event volume, not infrastructure growth.

EC2 - Other — 2026-07-15

Severity: Critical | Type: Removed Resource | Actual: \$9.97 | Baseline: \$15.53 | Change: -35.8%

EC2 - Other cost dropped on 2026-07-15 because 11 resources stopped billing (was billing the prior period, now \$0), saving \$2/day. Largest: arn:aws:ec2:ap-south-1:647121335538:snapshot/snap-0ad576c93342c819f (was \$0.12/day).
